AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application:

Listing of Claims:

1. (Currently Amended) A method of user data entry, at a terminal, for communication to a remote destination comprising the steps of:
 - a) displaying at least one data entry field to a user;
 - b) automatically displaying a user selectable icon ~~option~~ in response to user selection of the data entry field; and
 - c) providing, to the user, access to an electronic wallet application, for the transfer of data into the data entry field, in response to user selection of the icon ~~option~~.
2. (Original) A method as claimed in claim 1, wherein the wallet application includes a secure collection of personal data.
3. (Original) A method as claimed in claim 2, wherein at least some of the personal data is for completing an electronic commerce transaction.
4. (Original) A method as claimed in claim 1, wherein the terminal is an Internet terminal.
5. (Original) A method as claimed in claim 1, wherein the terminal is a handheld mobile Internet terminal.
6. (Original) A method as claimed in claim 4, wherein the remote destination is an electronic commerce server.
7. (Original) A method as claimed in claim 4, wherein steps a), b) and c) are provided by a browser application.

Serial No.: 10/606,177
Art Unit: 3625

8. (Original) A method as claimed in claim 1, wherein the option is a selectable device or icon.
9. (Currently Amended) A method as claimed in claim 8, further comprising the step of displaying ~~wherein~~ the selectable device or icon ~~is displayed~~ in a position adjacent the data entry field.
10. (Original) A method as claimed in claim 1, wherein step b) is conditional on the availability of a wallet application.
11. (Original) A method as claimed in claim 1, wherein step b) is conditional on whether the wallet application is enabled or disabled.
12. (Original) A method as claimed in claim 1, wherein step c) involves the successful completion of a security routine before access to the wallet application is granted.
13. (Original) A method as claimed in claim 1, further comprising the step of automatically transferring data from the electronic wallet application into the data entry field, in response to user selection of the option.
14. (Original) A method as claimed in claim 1, further comprising the step of providing for user selectable transfer of data from the electronic wallet application into the data entry field, in response to user selection of the option.
15. (Canceled).
16. (Original) A computer program, embodied on a record medium, comprising program instructions for performing the method of claim 1.

Serial No.: 10/606,177
Art Unit: 3625

17. (Currently Amended) A data entry terminal, for communication of data entered by a user to a remote destination, comprising:

a display ;

a user input interface for selection of the data entry field and a displayed icon option;

and

a processor operable :

to detect the user selection of a displayed data entry field;

to provide a user selectable icon option automatically in the display, in response to the detection of the user selection of the displayed data entry field;

to detect user selection of the displayed option; and

to provide, to the user, access to an electronic wallet application, for the transfer of data into the data entry field, in response to the detection of the user selection of the icon option.

18. (Currently Amended) A method of user data entry, at a terminal, for communication to a remote destination comprising the steps of:

(a) displaying at least one data entry field to a user;

(b) detecting user selection of the displayed data entry field;

(c) automatically detecting whether a wallet application is enabled;

(d) displaying an icon, for user selection, if a wallet application is enabled, and not displaying the icon if the wallet application is not enabled; and

(e) providing access to the electronic wallet application, for the transfer of data into at least the data entry field, in response to user selection of the icon.
